LAB PROGRAM 9:

Write a program which creates two threads, one thread displaying "BMS College of Engineering" once every ten seconds and another displaying "CSE" once every two seconds.
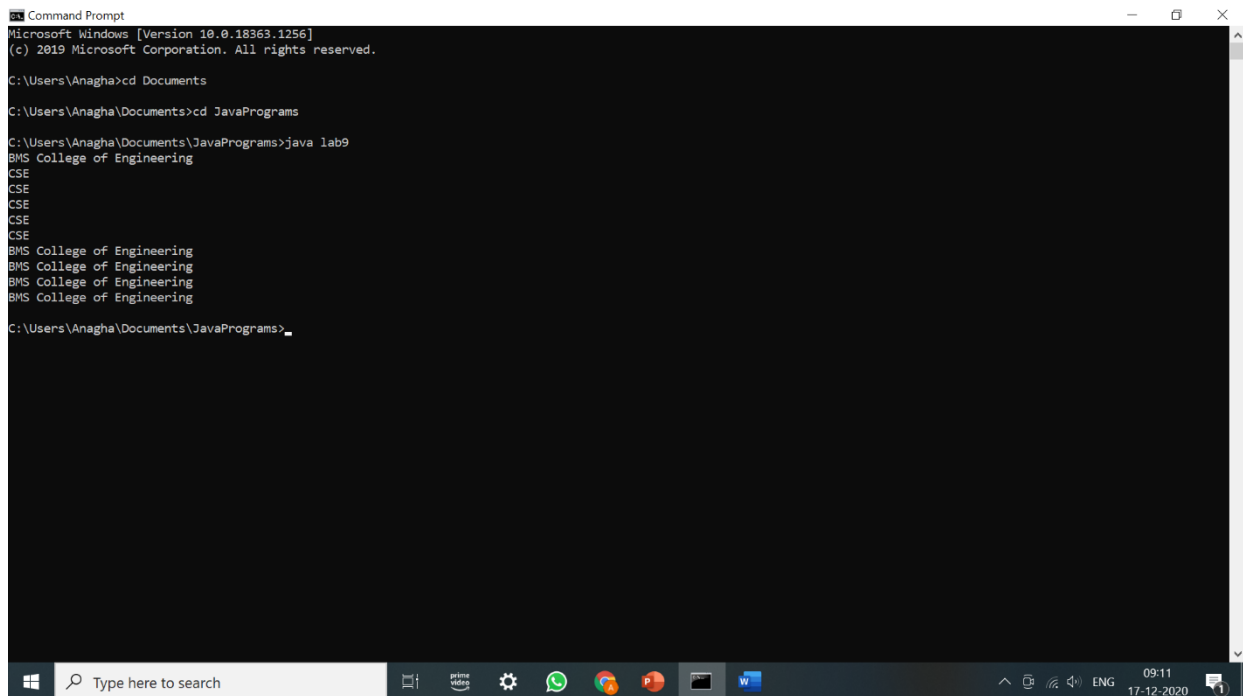

```java
import java.util.Scanner;

class BMS extends Thread
{
  int time;
  String str;
  BMS(int t,String s)
  {
    time = t;
    str = s;
  }
  public void run()
  {
      try{
        int i=0;
        while (i<5)
        {
          System.out.println(str);
          sleep(time);
          i++;
        }
      } catch (Exception e){
      }
  }
}
class lab9
```

```
{
  public static void main(String args[])
  {
    BMS t1 = new BMS(10000,"BMS College of Engineering");

    BMS t2 = new BMS(2000,"CSE");

    t1.start();

    t2.start();
  }
}
```

OUTPUT
